

# How to Install your Faucet Cover

After you've received your new faucet cover, follow the instructions below to properly install it on your outdoor faucet. Please be sure to remove all attachments from the faucet prior to installation.

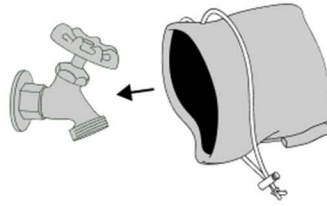

## Step One

Loosen drawcord by pressing and sliding the lock to the end-knot.

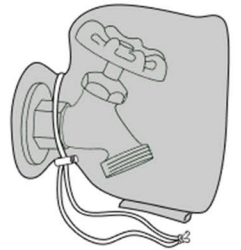

## Step Two

Separate drawcords to create a 360° circle. Place cord around the opening of the cover.

## Step Three

Slide cover over the faucet head.

## Step Four

Secure cover to faucet by pressing and sliding drawcord lock away from the end-knot until no slack remains.
