

How to Measure Your Car

Before you order your car cover, you will need to carefully measure it to ensure you are selecting the right one. Our guide below will walk you through the steps to correctly and accurately measure your car to ensure you get the best fit.

Length

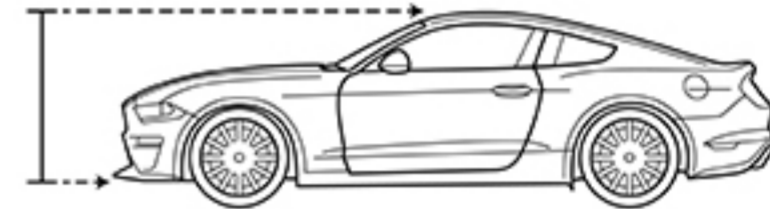

Measure from left to right across the longest part of your car, including bumpers, spare tires, and other accessories.

*Measure in a straight line across your vehicle, do not measure any contours.

Width

Measure from left to right across the widest part of your car, including tires but not including side mirrors.

Height

Measure the tallest point of your car from the ground up, including roof racks or other accessories.

Please round up your dimensions to the nearest inch.

Additional Tips

Try laying your tape measure on the ground alongside your vehicle for easy measuring.

If no cover matches your exact dimensions, choose one that is slightly larger.

You can also use our Cover Search tool to find the right cover for your car. Simply enter your make, model, and year to find the cover you need.
