

How to Measure Your Island Grill

Before you order your cover, you will need to carefully measure the island grill it is meant to cover. Our guide below will walk you through the steps to correctly and accurately measure your grill to ensure you get the best fit.

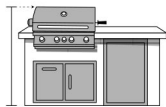

Width

Measure from left to right across the front of the grill (include side tables)

Depth

Measure back to front of grill

Height

Measure from ground to top of grill hood (when closed)

Please round up your dimensions to the nearest inch.

Please note: Published dimensions for grill cover styles refer to grill dimensions

Additional Tips

If no BBQ grill or island grill cover with your exact dimensions exists, choose one that is slightly larger in width and depth

Each cover is intuitively designed to allow for hem-to-ground space for necessary air circulation
